DETAILED ACTION

This action is in response to papers filed on September 18, 2007.

Claims 1, 4, 7-12 and 15 have been amended.

Claims 1-12 and 15 are pending.

Claims 1-12 and 15 are rejected.

Claim Rejections - 35 USC § 103

1. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-12 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,598, 557 Doner et al; Apparatus and Method for Retrieving and Grouping images representing text files based on relevance of key words extracted from a selected file to the text files in view of US Patent publication 20020077884 Sketch Online Method and System for Providing Learning Solutions for the elimination of Functional Competency Gaps.

As to claims 1, 4, 7-12 and 15 Doner teaches an Apparatus system and method for determining a similarity level between a users search input query(C. 2 l. 60-65).

Donor further teaches determining a text relevancy(importance level) of the queried terms of the documents in the data storage (C. 7 I. 45-55).

Donor fails to teach the apparatus searching two types of training materials and the training materials being those supplied by the organization and those being supported by a third party. Sketch teaches allowing employees to search for several types of training materials vendor(¶40 and custom corporate ¶ 41). It would have been obvious to one skilled in the art to combine Sketch with Donnor as one would obtain predictable results when combining known query retrieval elements/methods of Donnor with the training query process of Sketch.

As to claims 2 and 5 Doner teaches obtaining importance levels of words (C. 6 I. 1-3).

As to claims 3 and 6 Doner teaches data mining(Fig. 7 Ref 702)
